

# Art of Application

## WALES Product Category Guide

### www.WALES - Mixing Sequence

<b>W</b>	<b>Water</b> goes into the clean tank first. Fill the tank at least 1/2 full and start agitation.
<b>W</b>	Add <b>Water Soluble Bags (WSB)</b> to the tank into clean water before adding any other tank mix partners. Allow the water soluble bags to completely dissolve before adding any other products.
<b>W</b>	Add <b>Wettable Powders (WP)</b>
<b>W</b>	Add <b>Water Dispersible Granules (WDG)</b>
<b>A</b>	Maintain <b>Agitation</b> and allow the dry products to mix thoroughly to ensure uniform dispersion before adding other products. This might take a few minutes.
<b>L</b>	Add <b>Liquid Flowables</b> Suspension Concentrates (SC) or Suspo-emulsions (SE)
<b>E</b>	Add <b>Emulsifiable Concentrates (EC)</b> or Microemulsion Concentrates (MEC)
<b>S</b>	Add <b>Solutions (SN)</b> or <b>Soluble Liquids (SL)</b> . Finish by completely filling the spray tank with water and continue to agitate until the spray application is complete.
